

Speech to Text-Online Learning

Google Speech to Text

- Google Speech to Text has good accuracy for transcribing spoken words to text.
- To utilize this feature:
 - **Open** google docs.
 - Create a blank document or enter an existing document
 - Select **Tools** on the toolbar. And select Voice Typing. (Note: Must allow google to the use of your microphone to be able to use)

Microsoft Learning Tools

- Microsoft Learning Tools can be found in the newest version of [Microsoft Office](#) which you can get for free as an Adelphi student.
- [Learning Tools offers](#): Text Spacing increases the spacing between words, characters, and lines.
 - Syllables shows breaks between syllables, to improve word recognition and pronunciation.
 - Read Aloud lets you hear your document as each word is highlighted.

Speech to Text on Moodle-

- Please refer to the Moodle Accessibility Tools description page.
